Client System (GL): <>
Expected Finalisation Date: <>
Version: <> | Status: <> | Issued: <>

Contents

1. 1. Engagement Summary
2. 2. About Digitech Assurance
3. 3. Analytics Scope & Assertion Mapping
4. 4. Data Requirements & IPE
5. 5. Delivery Management & Timeline
6. 6. Budget & Fee Estimate
7. 7. Reporting & Lines of Communication
8. 8. Digitech Assurance Team
9. 9. Acceptance & Approval
10. A. Appendix: Analytics Test Register
11. B. Appendix: Scope Assumptions & Limitations

1. Engagement Summary

In support of the annual financial statutory audit for the year ending <>, the Digitech Assurance division of SNG Grant Thornton takes pleasure in submitting our data analytics audit planning memorandum for <>. This memorandum has been prepared to align analytics procedures with your audit strategy and risk assessment.

What we will do

- Plan data analytics procedures aligned to identified audit risks and assertions
- Perform/Prepare data for full population CAATs tests per agreed scope: (<>)
- Document results in working papers that the engagement team can incorporate into HarmoniX / Leap audit file
- Support the engagement team with exception investigations and MLPs

How it links to the audit

- Every analytics test is anchored to a specific audit assertion (ISA 315 / ISA 240 / ISA 330) with support from the audit team
- Findings are communicated to the engagement manager and team before finalisation
- Full population testing reduces reliance on sampling for covered areas
- IPE testing performed per ISA 500 before relying on client data extracts

What you will receive

- Exception reports per analytics area with auditor commentary
- Working papers provided to the engagement team and filed to relevant engagement audit file when required
- Support the audit team in drafting management letter point (MLP) support where control deficiencies are identified
- Completed analytics by expected finalisation date: <>

2. About Digitech Assurance

Digitech Assurance Data Analytics is the dedicated data analytics function within SNG Grant Thornton's Digital and Technology Assurance division. We support audit engagement teams by performing Computer-Assisted Audit Techniques (CAATs) as a co-sourced service – we are not the external auditors; we are a specialist support function that delivers analytics evidence ready to be incorporated into the audit file.

Our ISA mandate

ISA 240 — Fraud	Journal entry testing and anomaly detection to identify fraud risk indicators
ISA 315 — Risk ID	Data analytics to support understanding of entity systems, risks and controls
ISA 330 — Responses	Substantive analytics procedures addressing identified risks at the assertion level
ISA 500 — Evidence	IPE testing to confirm completeness and accuracy of client-provided data before use
ISA 520 — Analytics	Analytical procedures comparing recorded amounts to expectations via full population test

3. Analytics Scope & Assertion Mapping

Analytics Area	Entities / Components	Sub■tasks / Scope	Assertions	Status
----------------	-----------------------	-------------------	------------	--------

4. Data Requirements & IPE Testing

IPE Note (ISA 500): Prior to performing any CAATs procedure, Digitech Assurance will obtain/test the accuracy and completeness of all client provided data extracts. Data is treated as Information Produced by the Entity (IPE) and reconciled to source records before reliance is placed on any analytical results.

Analytics Area	Data Required	Source System	ETA	Date Received	IPE Tested?
----------------	---------------	---------------	-----	---------------	-------------

5. Delivery Management & Timeline

Our 6■phase CAATs lifecycle aligns to the audit work programme.

Phase	Description	Date
01	PHASE_1_DATE	
02	PHASE_2_DATE	
03	PHASE_3_DATE	
04	PHASE_4_DATE	
05	PHASE_5_DATE	
06	PHASE_6_DATE	

6. Budget & Fee Estimate

Grade / Tier	Rate (ZAR/hr)	Est. Hours	Est. Fees (ZAR)
CAATs Execution – Junior / Senior Consultant	<<RATE_CONS>>	<<HRS_CONS>>	<<FEE_CONS>>
Management – Manager / Senior Manager	<<RATE_MG>>	<<HRS_MGR>>	<<FEE_MGR>>
Direction & QA – Director / Assoc. Director	<<RATE_DIR>>	<<HRS_DIR>>	<<FEE_DIR>>
TOTAL	<<TOT_HRS>>	<<TOT_FEES>>	

7. Reporting & Lines of Communication

Analytics results will be communicated to the SNG GT audit engagement team only – not directly to the client.

Name	Designation	Take Corrective Action	For Information Only	Review Prior to Release	Signoff?
<<CONTACT_1_NAME>>	<<CONTACT_1_ROLE>>	<<CONTACT_1_CORRECTIVE ACTION>>	<<CONTACT_1_INFO>>	<<CONTACT_1_REVIEW>>	<<CONTACT_1_SIGNOFF>>
